

Votes in 2017 District Attorney Election Normalized by Population Estimates

All candidates. Areas covering census blocks with over 82.69% population non-Hispanic black or Hispanic are highlighted. See population estimation methodology.

Note that population estimation method misallocates some votes to election districts, yielding some districts in which the number of votes cast is greater than the estimated population (yielding a ratio greater than one).

Legend

 2016 Pop. Black/Hispanic > 82.69%

2017 DA Race (by Election District)

Total Ballots / Adjusted Population

 0.00000000 - 0.088611905

 0.088611906 - 0.129682854

 0.129682855 - 0.170684033

 0.170684034 - 0.241326889

 0.241326890 - 4.12513222
